# Chapter 1

## Namespace Index

### 1.1 Packages

Here are the packages with brief descriptions (if available):

<a href="#">game_core</a> . . . . .	7
-------------------------------------	---

## Chapter 2

# Hierarchical Index

### 2.1 Class Hierarchy

This inheritance list is sorted roughly, but not completely, alphabetically:

FingerEvent . . . . .	20
IProduct . . . . .	35
ShopLink . . . . .	42
game_core.ITouchable . . . . .	36
game_core.TouchBehaviour . . . . .	46
groundBehaviour . . . . .	26
MonoBehaviour	
AdBehaviour . . . . .	9
AdmobManager . . . . .	9
CSVReader . . . . .	18
FadePanelBehaviour . . . . .	19
game_core.TouchBehaviour . . . . .	46
gameBehaviour . . . . .	22
LevelManager . . . . .	36
LinkButton . . . . .	38
loadScene . . . . .	39
MultiTouchController . . . . .	39
MusicBehaviour . . . . .	40
musicButtonIconBehaviour . . . . .	41
ShopController . . . . .	42
ShopLink . . . . .	42
soundButtonIconBehaviour . . . . .	44
StatsData . . . . .	46
State	
gameBehaviour.checkState . . . . .	18
gameBehaviour.idleState . . . . .	32
gameBehaviour.initState . . . . .	33
gameBehaviour.startGame . . . . .	45
gameBehaviour.youLoseState . . . . .	52
gameBehaviour.youWinState . . . . .	53
groundBehaviour.destroyedState . . . . .	19
groundBehaviour.idleState . . . . .	31
groundBehaviour.initState . . . . .	35
groundBehaviour.updatedState . . . . .	50
groundBehaviour.updateStartedState . . . . .	51
groundBehaviour.updatingState . . . . .	51

## Chapter 3

# Class Index

### 3.1 Class List

Here are the classes, structs, unions and interfaces with brief descriptions:

<a href="#">AdBehaviour</a>	9
<a href="#">AdmobManager</a>	
Admob manager.	9
<a href="#">gameBehaviour.checkState</a>	
Checks the result.	18
<a href="#">CSVReader</a>	18
<a href="#">groundBehaviour.destroyedState</a>	
destroyedState	19
<a href="#">FadePanelBehaviour</a>	
Fade panel behaviour class; makes that panels (dis)appear on the screen smoothly.	19
<a href="#">FingerEvent</a>	
Finger event.	20
<a href="#">gameBehaviour</a>	
Defines the game behaviour. Here is where all the action is controlled and executed.	22
<a href="#">groundBehaviour</a>	
This class controls the ground behaviour. Gets the click/tap event and calls to the <a href="#">game↔Behaviour</a> .	26
<a href="#">groundBehaviour.idleState</a>	
idleState	31
<a href="#">gameBehaviour.idleState</a>	
idle state	32
<a href="#">gameBehaviour.initState</a>	
pre-game state. It could be used to show ready, steady go message for example.	33
<a href="#">groundBehaviour.initState</a>	
initState	35
<a href="#">IProduct</a>	
I product.	35
<a href="#">game_core.ITouchable</a>	
I touchable.	36
<a href="#">LevelManager</a>	
Level manager class; Deals with level load transaction.	36
<a href="#">LinkButton</a>	
Link canvas button class; manage external links.	38
<a href="#">loadScene</a>	
Load Async or Sync the scene indicated in the sceneName variable.	39

<a href="#">MultiTouchController</a>	
Multi touch controller. . . . .	39
<a href="#">MusicBehaviour</a>	
Music mute configuration. . . . .	40
<a href="#">musicButtonIconBehaviour</a> . . . . .	41
<a href="#">ShopController</a>	
Shop controller. . . . .	42
<a href="#">ShopLink</a>	
Shop link. . . . .	42
<a href="#">soundButtonIconBehaviour</a>	
Switches between ON/OFF states the sound of game. Changes the button icon depending on the sound state. . . . .	44
<a href="#">gameBehaviour.startGame</a>	
Initializes the game flow. . . . .	45
<a href="#">StatsData</a>	
Stats data class; manages the stats saved in PlayerPrefs. . . . .	46
<a href="#">game_core.TouchBehaviour</a>	
Touch behaviour . . . . .	46
<a href="#">groundBehaviour.updatedState</a>	
updatedState . . . . .	50
<a href="#">groundBehaviour.updateStartedState</a>	
updateStartedState . . . . .	51
<a href="#">groundBehaviour.updatingState</a>	
updatingState . . . . .	51
<a href="#">gameBehaviour.youLoseState</a>	
Tells the player he/she is a loser and resets the score vars. . . . .	52
<a href="#">gameBehaviour.youWinState</a>	
Tells the player he/she is the winner and increases the difficulty level. . . . .	53

## Chapter 4

# Namespace Documentation

### 4.1 game\_core Namespace Reference

#### Classes

- interface [ITouchable](#)  
*I touchable.*
- class [TouchBehaviour](#)  
*Touch behaviour*

## Chapter 5

# Class Documentation

### 5.1 AdBehaviour Class Reference

Inheritance diagram for AdBehaviour:

#### Public Attributes

- AdSystems **adSystem**

The documentation for this class was generated from the following file:

- C:/Users/mrferrys/Documents/looneybits/works/unity/samsara/Assets/samsara/scripts/adsystem/AdBehaviour.cs

### 5.2 AdmobManager Class Reference

Admob manager.

Inheritance diagram for AdmobManager:

## Static Public Member Functions

- static string [GetDeviceID](#) ()

- static AdRequest [createAdRequest](#) ()

*Returns an ad request with custom ad targeting.*

- static void [ShowInterstitial](#) ()

*Shows the interstitial.*

- static void [DestroyInterstitial](#) ()

*Hides the interstitial.*

- static void [ShowBanner](#) ()

*Shows the banner.*

- static void [HideBanner](#) ()

*Hides the banner.*

- static void [DestroyBanner](#) ()

*Destroies the banner.*

- static void [HandleAdLoaded](#) (object sender, EventArgs args)

*Handles the ad loaded.*

- static void [HandleAdFailedToLoad](#) (object sender, AdFailedToLoadEventArgs args)

*Handles the ad failed to load.*

- static void [HandleAdOpened](#) (object sender, EventArgs args)

*Handles the ad opened.*

- static void [HandleAdClosing](#) (object sender, EventArgs args)

*Handles the ad closing.*

- static void [HandleAdClosed](#) (object sender, EventArgs args)

*Handles the ad closed.*

- static void [HandleAdLeftApplication](#) (object sender, EventArgs args)

*Handles the ad left application.*

- static void [HandleInterstitialLoaded](#) (object sender, EventArgs args)

*Handles the interstitial loaded.*

- static void [HandleInterstitialFailedToLoad](#) (object sender, AdFailedToLoadEventArgs args)

*Handles the interstitial failed to load.*

- static void [HandleInterstitialOpened](#) (object sender, EventArgs args)

*Handles the interstitial opened.*

- static void [HandleInterstitialClosing](#) (object sender, EventArgs args)

*Handles the interstitial closing.*

- static void [HandleInterstitialClosed](#) (object sender, EventArgs args)

*Handles the interstitial closed.*

- static void [HandleInterstitialLeftApplication](#) (object sender, EventArgs args)

*Handles the interstitial left application.*

### Static Protected Attributes

- static [AdmobManager](#) **instance**

### Properties

- static [AdmobManager Instance](#) [get]

*Gets the instance.*

- static bool [isBannerRequested](#) [get]

*Gets a value indicating whether this [AdmobManager](#) is banner requested.*

## 5.2.1 Detailed Description

Admob manager.

## 5.2.2 Member Function Documentation

### 5.2.2.1 createAdRequest()

```
static AdRequest AdmobManager.createAdRequest ( ) [static]
```

Returns an ad request with custom ad targeting.

#### Returns

The ad request.

### 5.2.2.2 DestroyBanner()

```
static void AdmobManager.DestroyBanner ( ) [static]
```

Destroys the banner.

### 5.2.2.3 DestroyInterstitial()

```
static void AdmobManager.DestroyInterstitial ( ) [static]
```

Hides the interstitial.

### 5.2.2.4 GetDeviceID()

```
static string AdmobManager.GetDeviceID ( ) [static]
```

<http://answers.unity3d.com/questions/834119/admob-device-id-on-ios-for-test-ads.html> <http://wiki.unity3d.com/index.php?title=MD5> HOW TO GET THE DEVICE ID. UnityEngine.AndroidJavaClass up = new UnityEngine.AndroidJavaClass("com.unity3d.player.UnityPlayer"); UnityEngine.AndroidJavaObject currentActivity = up.GetStatic<UnityEngine.AndroidJavaObject>("currentActivity"); UnityEngine.AndroidJavaObject contentResolver = currentActivity.Call<UnityEngine.AndroidJavaObject>("getContentResolver"); UnityEngine.AndroidJavaObject secure = new UnityEngine.AndroidJavaObject("android.provider.Settings\$Secure"); string deviceId = secure.CallStatic<string>("getString", contentResolver, "android\_id"); Debug.Log(Md5Sum(deviceId).ToUpper());

### 5.2.2.5 HandleAdClosed()

```
static void AdmobManager.HandleAdClosed (
    object sender,
    EventArgs args ) [static]
```

Handles the ad closed.

#### Parameters

<i>sender</i>	Sender.
<i>args</i>	Arguments.

### 5.2.2.6 HandleAdClosing()

```
static void AdmobManager.HandleAdClosing (
    object sender,
    EventArgs args ) [static]
```

Handles the ad closing.

#### Parameters

<i>sender</i>	Sender.
<i>args</i>	Arguments.

#### 5.2.2.7 HandleAdFailedToLoad()

```
static void AdmobManager.HandleAdFailedToLoad (
    object sender,
    AdFailedToLoadEventArgs args ) [static]
```

Handles the ad failed to load.

##### Parameters

<i>sender</i>	Sender.
<i>args</i>	Arguments.

#### 5.2.2.8 HandleAdLeftApplication()

```
static void AdmobManager.HandleAdLeftApplication (
    object sender,
    EventArgs args ) [static]
```

Handles the ad left application.

##### Parameters

<i>sender</i>	Sender.
<i>args</i>	Arguments.

#### 5.2.2.9 HandleAdLoaded()

```
static void AdmobManager.HandleAdLoaded (
    object sender,
    EventArgs args ) [static]
```

Handles the ad loaded.

##### Parameters

<i>sender</i>	Sender.
<i>args</i>	Arguments.

#### 5.2.2.10 HandleAdOpened()

```
static void AdmobManager.HandleAdOpened (
    object sender,
    EventArgs args ) [static]
```

Handles the ad opened.

##### Parameters

<i>sender</i>	Sender.
<i>args</i>	Arguments.

#### 5.2.2.11 HandleInterstitialClosed()

```
static void AdmobManager.HandleInterstitialClosed (
    object sender,
    EventArgs args ) [static]
```

Handles the interstitial closed.

##### Parameters

<i>sender</i>	Sender.
<i>args</i>	Arguments.

#### 5.2.2.12 HandleInterstitialClosing()

```
static void AdmobManager.HandleInterstitialClosing (
    object sender,
    EventArgs args ) [static]
```

Handles the interstitial closing.

##### Parameters

<i>sender</i>	Sender.
<i>args</i>	Arguments.

#### 5.2.2.13 HandleInterstitialFailedToLoad()

```
static void AdmobManager.HandleInterstitialFailedToLoad (
```

```
object sender,  
AdFailedToLoadEventArgs args ) [static]
```

Handles the interstitial failed to load.

#### Parameters

<i>sender</i>	Sender.
<i>args</i>	Arguments.

#### 5.2.2.14 HandleInterstitialLeftApplication()

```
static void AdmobManager.HandleInterstitialLeftApplication (  
    object sender,  
    EventArgs args ) [static]
```

Handles the interstitial left application.

#### Parameters

<i>sender</i>	Sender.
<i>args</i>	Arguments.

#### 5.2.2.15 HandleInterstitialLoaded()

```
static void AdmobManager.HandleInterstitialLoaded (  
    object sender,  
    EventArgs args ) [static]
```

Handles the interstitial loaded.

#### Parameters

<i>sender</i>	Sender.
<i>args</i>	Arguments.

#### 5.2.2.16 HandleInterstitialOpened()

```
static void AdmobManager.HandleInterstitialOpened (  
    object sender,  
    EventArgs args ) [static]
```

Handles the interstitial opened.

## Parameters

<i>sender</i>	Sender.
<i>args</i>	Arguments.

## 5.2.2.17 HideBanner()

```
static void AdmobManager.HideBanner ( ) [static]
```

Hides the banner.

## 5.2.2.18 Md5Sum()

```
static string AdmobManager.Md5Sum (
    string strToEncrypt ) [static]
```

Md5Sum.

## Returns

MD5

## Parameters

<i>strToEncrypt</i>	String to encrypt.
---------------------	--------------------

## 5.2.2.19 RequestBanner()

```
static void AdmobManager.RequestBanner ( ) [static]
```

Requests the banner. <http://stackoverflow.com/questions/24268888/how-to-test-admob-in-real-dev>

### 5.2.2.20 RequestInterstitial()

```
static void AdmobManager.RequestInterstitial ( ) [static]
```

Requests the interstitial. <http://stackoverflow.com/questions/24268888/how-to-test-admob-in-real-de>  
[https://github.com/googleads/googleads-mobile-android-examples/blob/master/admob/](https://github.com/googleads/googleads-mobile-android-examples/blob/master/admob/InterstitialExample/app/src/main/res/values/strings.xml)  
[InterstitialExample/app/src/main/res/values/strings.xml](https://developers.google.com/admob/android/quick-start) [https://developers.](https://developers.google.com/admob/android/quick-start)

### 5.2.2.21 ShowBanner()

```
static void AdmobManager.ShowBanner ( ) [static]
```

Shows the banner.

### 5.2.2.22 ShowInterstitial()

```
static void AdmobManager.ShowInterstitial ( ) [static]
```

Shows the interstitial.

## 5.2.3 Property Documentation

### 5.2.3.1 Instance

```
AdmobManager AdmobManager.Instance [static], [get]
```

Gets the instance.

The instance.

### 5.2.3.2 isBannerRequested

```
bool AdmobManager.isBannerRequested [static], [get]
```

Gets a value indicating whether this [AdmobManager](#) is banner requested.

true if is banner requested; otherwise, false.

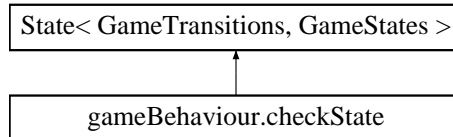

The documentation for this class was generated from the following file:

- C:/Users/mrferrys/Documents/looneybits/works/unity/samsara/Assets/samsara/scripts/adsystem/Admob↔  
Manager.cs

## 5.3 gameBehaviour.checkState Class Reference

Checks the result.

Inheritance diagram for gameBehaviour.checkState:

### Public Member Functions

- **checkState** ([gameBehaviour](#) parent)
- override void **Reason** ()
- override void **Act** ()
- override void **DoBeforeEntering** ()
- override void **DoBeforeLeaving** ()

#### 5.3.1 Detailed Description

Checks the result.

The documentation for this class was generated from the following file:

- C:/Users/mrferrys/Documents/looneybits/works/unity/samsara/Assets/samsara/scripts/game/gameBehaviour.↔  
cs

## 5.4 CSVReader Class Reference

Inheritance diagram for CSVReader:

### Public Member Functions

- void **Start** ()

### Static Public Member Functions

- static void **DebugOutputGrid** (string[,] grid)
- static string [,] **SplitCsvGrid** (string csvText)
- static string [] **SplitCsvLine** (string line)

## Public Attributes

- TextAsset **csvFile**

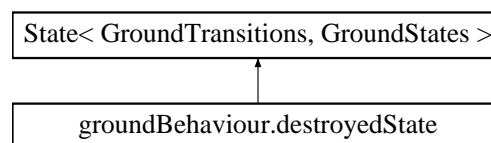

The documentation for this class was generated from the following file:

- C:/Users/mrferrys/Documents/looneybits/works/unity/samsara/Assets/samsara/scripts/shop/CSVReader.cs

## 5.5 groundBehaviour.destroyedState Class Reference

### destroyedState

Inheritance diagram for groundBehaviour.destroyedState:

## Public Member Functions

- **destroyedState** ([groundBehaviour](#) parent)
- override void **Reason** ()
- override void **Act** ()
- override void **DoBeforeEntering** ()
- override void **DoBeforeLeaving** ()

### 5.5.1 Detailed Description

### destroyedState

The documentation for this class was generated from the following file:

- C:/Users/mrferrys/Documents/looneybits/works/unity/samsara/Assets/samsara/scripts/game/groundBehaviour.cs

## 5.6 FadePanelBehaviour Class Reference

Fade panel behaviour class; makes that panels (dis)appear on the screen smoothly.

Inheritance diagram for FadePanelBehaviour:

## Public Member Functions

- void [fadeIn](#) ()  
*Fade IN.*

## Public Attributes

- float **fadeTime** = 1.0f
- bool **fadeInFlag** = true

### 5.6.1 Detailed Description

Fade panel behaviour class; makes that panels (dis)appear on the screen smoothly.

### 5.6.2 Member Function Documentation

#### 5.6.2.1 [fadeIn\(\)](#)

```
void FadePanelBehaviour.fadeIn ( )
```

Fade IN.

The documentation for this class was generated from the following file:

- C:/Users/mrferrys/Documents/looneybits/works/unity/samsara/Assets/samsara/scripts/ui/FadePanel↔  
Behaviour.cs

## 5.7 FingerEvent Class Reference

Finger event.

## Public Member Functions

- [FingerEvent](#) (ITouchable it=null)  
*Initializes a new instance of the [FingerEvent](#) class.*
- bool [Add](#) (ITouchable obj)  
*Add the specified obj.*
- [ITouchable](#) [getLast](#) ()  
*Gets the last GameObject added.*
- void [clearList](#) ()  
*Clears the list.*
- bool [containsObject](#) (ITouchable obj)
- [ITouchable](#) [remove](#) (ITouchable obj)  
*Remove the specified obj.*

## Public Attributes

- List< [ITouchable](#) > **touchedObjects** =new List<[ITouchable](#)>()

### 5.7.1 Detailed Description

Finger event.

### 5.7.2 Constructor & Destructor Documentation

#### 5.7.2.1 FingerEvent()

```
FingerEvent.FingerEvent (
    ITouchable it = null )
```

Initializes a new instance of the [FingerEvent](#) class.

#### Parameters

<i>it</i>	It.
-----------	-----

### 5.7.3 Member Function Documentation

#### 5.7.3.1 Add()

```
bool FingerEvent.Add (
    ITouchable obj )
```

Add the specified obj.

#### Parameters

<i>obj</i>	Object.
------------	---------

#### 5.7.3.2 clearList()

```
void FingerEvent.clearList ( )
```

Clears the list.

### 5.7.3.3 containsObject()

```
bool FingerEvent.containsObject (
    ITouchable obj )
```

Checks if touched gameObject(obj) was registered previously touched.

#### Returns

true, if object was contained, false otherwise.

#### Parameters

<i>obj</i>	Object.
------------	---------

### 5.7.3.4 getLast()

```
ITouchable FingerEvent.getLast ( )
```

Gets the last GameObject added.

#### Returns

The last.

### 5.7.3.5 remove()

```
ITouchable FingerEvent.remove (
    ITouchable obj )
```

Remove the specified obj.

#### Parameters

<i>obj</i>	Object.
------------	---------

The documentation for this class was generated from the following file:

- C:/Users/mrferrys/Documents/looneybits/works/unity/samsara/Assets/samsara/scripts/controls/MultiTouch↔ Controller.cs

## 5.8 gameBehaviour Class Reference

Defines the game behaviour. Here is where all the action is controlled and executed.

Inheritance diagram for gameBehaviour:

## Classes

- class `checkState`  
*Checks the result.*
- class `idleState`  
*idle state*
- class `initState`  
*pre-game state. It could be used to show ready, steady go message for example.*
- class `startGame`  
*Initializes the game flow.*
- class `youLoseState`  
*Tells the player he/she is a loser and resets the score vars.*
- class `youWinState`  
*Tells the player he/she is the winner and increases the difficulty level.*

## Public Member Functions

- void `initTiles` ()  
*Initializes the sample map tiles.*
- void `initPlayerTiles` ()  
*Initializes the player map tiles.*
- void `initPanels` ()  
*Initializes the panels .i.e. youWinPanel & youLosePanel*
- void `resetScore` ()  
*Initializes the score var(S).*
- bool `checkResult` ()  
*Checks if the answer is right or not.*
- bool `setTimeCycle` ()  
*Sets the time of a life cycle.*
- void `onCheckPressed` ()  
*When the check button is pressed this function is triggered.*
- void `updateLevel` ()  
*Updates the player level.*
- void `resetGame` ()  
*Resets the game.*
- void `nextLevel` ()  
*Takes the player to the next level.*
- void `SetTransition` (GameTransitions t)  
*Sets a new transition.*

## Public Attributes

- GameObject **youWinPanel**
- GameObject **youLosePanel**
- int **scoreFactor** = 10
- int **maxLevel** = 99
- int **level** = 0
- int **score** = 0
- float **timeCycle** = 1.0f

### 5.8.1 Detailed Description

Defines the game behaviour. Here is where all the action is controlled and executed.

### 5.8.2 Member Function Documentation

#### 5.8.2.1 checkResult()

```
bool gameBehaviour.checkResult ( )
```

Checks if the answer is right or not.

**Returns**

#### 5.8.2.2 initPanels()

```
void gameBehaviour.initPanels ( )
```

Initializes the panels .i.e. youWinPanel & youLosePanel

#### 5.8.2.3 initPlayerTiles()

```
void gameBehaviour.initPlayerTiles ( )
```

Initializes the player map tiles.

#### 5.8.2.4 initTiles()

```
void gameBehaviour.initTiles ( )
```

Initializes the sample map tiles.

#### 5.8.2.5 nextLevel()

```
void gameBehaviour.nextLevel ( )
```

Takes the player to the next level.

#### 5.8.2.6 onCheckPressed()

```
void gameBehaviour.onCheckPressed ( )
```

When the check button is pressed this function is triggered.

#### 5.8.2.7 resetGame()

```
void gameBehaviour.resetGame ( )
```

Resets the game.

#### 5.8.2.8 resetScore()

```
void gameBehaviour.resetScore ( )
```

Initializes the score var(S).

#### 5.8.2.9 setTimeCycle()

```
bool gameBehaviour.setTimeCycle ( )
```

Sets the time of a life cycle.

**Returns**

#### 5.8.2.10 SetTransition()

```
void gameBehaviour.SetTransition (
    GameTransitions t )
```

Sets a new transition.

## Parameters

<i>t</i>	
----------	--

## 5.8.2.11 updateLevel()

```
void gameBehaviour.updateLevel ( )
```

Updates the player level.

The documentation for this class was generated from the following file:

- C:/Users/mrferrys/Documents/looneybits/works/unity/samsara/Assets/samsara/scripts/game/gameBehaviour.↔  
cs

## 5.9 groundBehaviour Class Reference

This class controls the ground behaviour. Gets the click/tap event and calls to the [gameBehaviour](#).

Inheritance diagram for groundBehaviour:

## Classes

- class [destroyedState](#)  
*destroyedState*
- class [idleState](#)  
*idleState*
- class [initState](#)  
*initState*
- class [updatedState](#)  
*updatedState*
- class [updateStartedState](#)  
*updateStartedState*
- class [updatingState](#)  
*updatingState*

## Public Member Functions

- override void [OnEnable](#) ()  
*Use this for initialization*
- override void [Update](#) ()  
*Update is called once per frame*
- void [playSoundEffect](#) (string aSource)  
*Plays sound effect*
- void [initializeValues](#) ()  
*Used for initialization.*
- void [updateLevel](#) (int level)
- void [updateSortingOrder](#) ()
- override void [OnTouchBegan](#) (Vector3 value)  
*Raises the touch down event.*
- override void [OnTouchEnded](#) (Vector3 v)
- void [SetTransition](#) (GroundTransitions t)  
*SetTransition*

## Public Attributes

- float [lowPitchRange](#) = .95f  
*AUDIO VARIABLES*
- float [highPitchRange](#) = 1.05f
- int [playerLevel](#) = 0  
*CONTROL VARIABLES*
- GroundTypes **type** = GroundTypes.empty
- int **sortingOrderOffset** = 0

## Properties

- int [currentLevel](#) [get, set]
- int [maxLevel](#) [get]
- float [timeCycle](#) [get, set]

## Additional Inherited Members

### 5.9.1 Detailed Description

This class controls the ground behaviour. Gets the click/tap event and calls to the [gameBehaviour](#).

### 5.9.2 Member Function Documentation

#### 5.9.2.1 initializeValues()

```
void groundBehaviour.initializeValues ( )
```

Used for initialization.

#### 5.9.2.2 OnEnable()

```
override void groundBehaviour.OnEnable ( ) [virtual]
```

Use this for initialization

**Parameters**

<i>level</i>	
--------------	--

Reimplemented from [game\\_core.TouchBehaviour](#).

**5.9.2.3 OnTouchBegan()**

```
override void groundBehaviour.OnTouchBegan (
    Vector3 value ) [virtual]
```

Raises the touch down event.

Reimplemented from [game\\_core.TouchBehaviour](#).

**5.9.2.4 OnTouchEnded()**

```
override void groundBehaviour.OnTouchEnded (
    Vector3 v ) [virtual]
```

**Parameters**

<i>v</i>	
----------	--

Reimplemented from [game\\_core.TouchBehaviour](#).

**5.9.2.5 playSoundEffect()**

```
void groundBehaviour.playSoundEffect (
    string aSource )
```

Plays sound effect

**5.9.2.6 SetTransition()**

```
void groundBehaviour.SetTransition (
    GroundTransitions t )
```

SetTransition

**Parameters**

<i>t</i>	
----------	--

**5.9.2.7 Update()**

```
override void groundBehaviour.Update ( ) [virtual]
```

Update is called once per frame

Reimplemented from [game\\_core.TouchBehaviour](#).

**5.9.2.8 updateLevel()**

```
void groundBehaviour.updateLevel (
    int level )
```

**Parameters**

<i>level</i>	
--------------	--

**5.9.2.9 updateSortingOrder()**

```
void groundBehaviour.updateSortingOrder ( )
```

**Parameters**

<i>prevValue</i>	
<i>currentValue</i>	

**5.9.3 Member Data Documentation****5.9.3.1 lowPitchRange**

```
float groundBehaviour.lowPitchRange = .95f
```

**AUDIO VARIABLES**

### 5.9.3.2 playerLevel

```
int groundBehaviour.playerLevel = 0
```

## CONTROL VARIABLES

## 5.9.4 Property Documentation

### 5.9.4.1 currentLevel

```
int groundBehaviour.currentLevel [get], [set]
```

### 5.9.4.2 maxLevel

```
int groundBehaviour.maxLevel [get]
```

### 5.9.4.3 timeCycle

```
float groundBehaviour.timeCycle [get], [set]
```

The documentation for this class was generated from the following file:

- C:/Users/mrferrys/Documents/looneybits/works/unity/samsara/Assets/samsara/scripts/game/groundBehaviour.cs

## 5.10 groundBehaviour.idleState Class Reference

### idleState

Inheritance diagram for groundBehaviour.idleState:

## Public Member Functions

- **idleState** ([groundBehaviour](#) parent)
- override void **Reason** ()
- override void **Act** ()
- override void **DoBeforeEntering** ()
- override void **DoBeforeLeaving** ()

### 5.10.1 Detailed Description

#### [idleState](#)

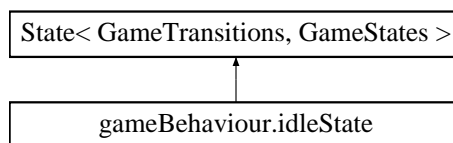

The documentation for this class was generated from the following file:

- C:/Users/mrferrys/Documents/looneybits/works/unity/samsara/Assets/samsara/scripts/game/groundBehaviour.cs

## 5.11 gameBehaviour.idleState Class Reference

idle state

Inheritance diagram for gameBehaviour.idleState:

## Public Member Functions

- **idleState** ([gameBehaviour](#) parent)
- override void **Reason** ()
- override void **Act** ()
- override void **DoBeforeEntering** ()
- override void **DoBeforeLeaving** ()

### 5.11.1 Detailed Description

idle state

### 5.11.2 Constructor & Destructor Documentation

#### 5.11.2.1 idleState()

```
gameBehaviour.idleState.idleState (
    gameBehaviour parent )
```

## Parameters

<i>parent</i>	
---------------	--

### 5.11.3 Member Function Documentation

#### 5.11.3.1 Act()

```
override void gameBehaviour.idleState.Act ( )
```

#### 5.11.3.2 DoBeforeEntering()

```
override void gameBehaviour.idleState.DoBeforeEntering ( )
```

#### 5.11.3.3 DoBeforeLeaving()

```
override void gameBehaviour.idleState.DoBeforeLeaving ( )
```

#### 5.11.3.4 Reason()

```
override void gameBehaviour.idleState.Reason ( )
```

The documentation for this class was generated from the following file:

- C:/Users/mrferrys/Documents/looneybits/works/unity/samsara/Assets/samsara/scripts/game/gameBehaviour.↔  
cs

## 5.12 gameBehaviour.initState Class Reference

pre-game state. It could be used to show ready, steady go message for example.

Inheritance diagram for gameBehaviour.initState:

## Public Member Functions

- **initState** ([gameBehaviour](#) parent)
- override void [Reason](#) ()
- override void [Act](#) ()
- override void [DoBeforeEntering](#) ()
- override void [DoBeforeLeaving](#) ()

### 5.12.1 Detailed Description

pre-game state. It could be used to show ready, steady go message for example.

### 5.12.2 Member Function Documentation

#### 5.12.2.1 Act()

```
override void gameBehaviour.initState.Act ( )
```

#### 5.12.2.2 DoBeforeEntering()

```
override void gameBehaviour.initState.DoBeforeEntering ( )
```

#### 5.12.2.3 DoBeforeLeaving()

```
override void gameBehaviour.initState.DoBeforeLeaving ( )
```

#### 5.12.2.4 Reason()

```
override void gameBehaviour.initState.Reason ( )
```

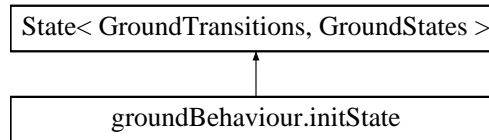

The documentation for this class was generated from the following file:

- C:/Users/mrferrys/Documents/looneybits/works/unity/samsara/Assets/samsara/scripts/game/gameBehaviour.[↔](#)  
cs

## 5.13 groundBehaviour.initState Class Reference

### initState

Inheritance diagram for groundBehaviour.initState:

### Public Member Functions

- **initState** ([groundBehaviour](#) parent)
- override void **Reason** ()
- override void **Act** ()
- override void **DoBeforeEntering** ()
- override void **DoBeforeLeaving** ()

#### 5.13.1 Detailed Description

### initState

The documentation for this class was generated from the following file:

- C:/Users/mrferrys/Documents/looneybits/works/unity/samsara/Assets/samsara/scripts/game/groundBehaviour.cs

## 5.14 IProduct Interface Reference

I product.

Inheritance diagram for IProduct:

### Properties

- string **ImageSource** [get, set]
- string **ProductName** [get, set]
- string **ProductLink** [get, set]
- string **ProductPrice** [get, set]
- string **ProductDescription** [get, set]

### 5.14.1 Detailed Description

I product.

The documentation for this interface was generated from the following file:

- C:/Users/mrferrys/Documents/looneybits/works/unity/samsara/Assets/samsara/scripts/shop/ShopLink.cs

## 5.15 game\_core.ITouchable Interface Reference

I touchable.

Inheritance diagram for game\_core.ITouchable:

### Public Member Functions

- void **OnTouchBegan** (Vector3 v)
- void **OnTouchCanceled** (Vector3 v)
- void **OnTouchEnded** (Vector3 v)
- void **OnTouchMoved** (Vector3 v)

### 5.15.1 Detailed Description

I touchable.

The documentation for this interface was generated from the following file:

- C:/Users/mrferrys/Documents/looneybits/works/unity/samsara/Assets/samsara/scripts/controls/TouchBehaviour.cs

## 5.16 LevelManager Class Reference

Level manager class; Deals with level load transaction.

Inheritance diagram for LevelManager:

## Static Public Member Functions

- static void [Load](#) (string name)  
*Load the specified name.*

## Static Protected Attributes

- static [LevelManager](#) **instance**
- static string **levelName** = ""

## Properties

- static [LevelManager](#) **Instance** [get]  
*Gets the instance.*
- static string [loadingLevel](#) [get, set]  
*Gets or sets the loading level.*

### 5.16.1 Detailed Description

Level manager class; Deals with level load transaction.

### 5.16.2 Member Function Documentation

#### 5.16.2.1 Load()

```
static void LevelManager.Load (  
    string name ) [static]
```

Load the specified name.

#### Parameters

<i>name</i>	Name.
-------------	-------

### 5.16.3 Property Documentation

#### 5.16.3.1 Instance

```
LevelManager LevelManager.Instance [static], [get]
```

Gets the instance.

The instance.

### 5.16.3.2 loadingLevel

```
string LevelManager.loadingLevel [static], [get], [set]
```

Gets or sets the loading level.

The loading level.

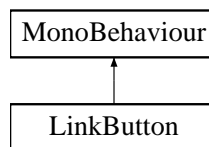

The documentation for this class was generated from the following file:

- C:/Users/mrferrys/Documents/looneybits/works/unity/samsara/Assets/samsara/scripts/game/LevelManager.↵  
cs

## 5.17 LinkButton Class Reference

Link canvas button class; manage external links.

Inheritance diagram for LinkButton:

### Public Member Functions

- void [action](#) ()  
*Action this instance.*

### Public Attributes

- string **link** = ""

### 5.17.1 Detailed Description

Link canvas button class; manage external links.

### 5.17.2 Member Function Documentation

### 5.17.2.1 action()

```
void LinkButton.action ( )
```

Action this instance.

The documentation for this class was generated from the following file:

- C:/Users/mrferrys/Documents/looneybits/works/unity/samsara/Assets/samsara/scripts/shop/LinkButton.cs

## 5.18 loadScene Class Reference

Load Async or Sync the scene indicated in the sceneName variable.

Inheritance diagram for loadScene:

### Public Member Functions

- void **OnClick** ()

### Public Attributes

- string **sceneName** = ""
- bool **loadSceneAsync** = true
- bool **showAd** = false

### 5.18.1 Detailed Description

Load Async or Sync the scene indicated in the sceneName variable.

The documentation for this class was generated from the following file:

- C:/Users/mrferrys/Documents/looneybits/works/unity/samsara/Assets/samsara/scripts/ui/loadScene.cs

## 5.19 MultiTouchController Class Reference

Multi touch controller.

Inheritance diagram for MultiTouchController:

## Public Attributes

- LayerMask **touchInputMask**

### 5.19.1 Detailed Description

Multi touch controller.

The documentation for this class was generated from the following file:

- C:/Users/mrferrys/Documents/looneybits/works/unity/samsara/Assets/samsara/scripts/controls/MultiTouch↔  
Controller.cs

## 5.20 MusicBehaviour Class Reference

Music mute configuration.

Inheritance diagram for MusicBehaviour:

## Public Member Functions

- void **setActive** (bool value)  
*Enable/Disable audio.*

### 5.20.1 Detailed Description

Music mute configuration.

### 5.20.2 Member Function Documentation

#### 5.20.2.1 setActive()

```
void MusicBehaviour.setActive (  
    bool value )
```

Enable/Disable audio.

## Parameters

<i>value</i>	If set to <code>true</code> value.
--------------	------------------------------------

The documentation for this class was generated from the following file:

- C:/Users/mrferrys/Documents/looneybits/works/unity/samsara/Assets/samsara/scripts/settings/MusicBehaviour.cs

## 5.21 musicButtonIconBehaviour Class Reference

Inheritance diagram for musicButtonIconBehaviour:

### Public Member Functions

- void [action](#) ()  
*Action this instance.*
- void [setIcon](#) ()  
*Sets the icon according to the volumen level.*

### Public Attributes

- Sprite **iconOn**
- Sprite **iconOff**

#### 5.21.1 Member Function Documentation

##### 5.21.1.1 action()

```
void musicButtonIconBehaviour.action ( )
```

Action this instance.

### 5.21.1.2 setIcon()

```
void musicButtonIconBehaviour.setIcon ( )
```

Sets the icon according to the volumen level.

The documentation for this class was generated from the following file:

- C:/Users/mrferrys/Documents/looneybits/works/unity/samsara/Assets/samsara/scripts/settings/music↔  
ButtonIconBehaviour.cs

## 5.22 ShopController Class Reference

Shop controller.

Inheritance diagram for ShopController:

### Public Attributes

- string **url** = "https://looneybits.github.io/projects/shop\_test.txt"
- string **msgOnFail** = "Visit www.looneybits.com"

### 5.22.1 Detailed Description

Shop controller.

The documentation for this class was generated from the following file:

- C:/Users/mrferrys/Documents/looneybits/works/unity/samsara/Assets/samsara/scripts/shop/ShopController.↔  
cs

## 5.23 ShopLink Class Reference

Shop link.

Inheritance diagram for ShopLink:

## Public Attributes

- string **link** = "http://looneybits.com"

## Properties

- string **ImageSource** [get, set]  
*Gets or sets the image source.*
- string **ProductLink** [get, set]  
*Gets or sets the product link.*
- string **ProductName** [get, set]  
*Gets or sets the name of the product.*
- string **ProductDescription** [get, set]  
*Gets or sets the product description.*
- string **ProductPrice** [get, set]  
*Gets or sets the product price.*

### 5.23.1 Detailed Description

Shop link.

### 5.23.2 Property Documentation

#### 5.23.2.1 ImageSource

```
string ShopLink.ImageSource [get], [set]
```

Gets or sets the image source.

The image source.

#### 5.23.2.2 ProductDescription

```
string ShopLink.ProductDescription [get], [set]
```

Gets or sets the product description.

The product description.

#### 5.23.2.3 ProductLink

```
string ShopLink.ProductLink [get], [set]
```

Gets or sets the product link.

The product link.

#### 5.23.2.4 ProductName

```
string ShopLink.ProductName [get], [set]
```

Gets or sets the name of the product.

The name of the product.

#### 5.23.2.5 ProductPrice

```
string ShopLink.ProductPrice [get], [set]
```

Gets or sets the product price.

The product price.

The documentation for this class was generated from the following file:

- C:/Users/mrferrys/Documents/looneybits/works/unity/samsara/Assets/samsara/scripts/shop/ShopLink.cs

## 5.24 soundButtonIconBehaviour Class Reference

Switches between ON/OFF states the sound of game. Changes the button icon depending on the sound state.

Inheritance diagram for soundButtonIconBehaviour:

### Public Member Functions

- void `action` ()  
*Action this instance.*
- void `setIcon` ()  
*Sets the icon according to the volumen level.*

### Public Attributes

- Sprite `iconOn`
- Sprite `iconOff`

#### 5.24.1 Detailed Description

Switches between ON/OFF states the sound of game. Changes the button icon depending on the sound state.

### 5.24.2 Member Function Documentation

#### 5.24.2.1 action()

```
void soundButtonIconBehaviour.action ( )
```

Action this instance.

#### 5.24.2.2 setIcon()

```
void soundButtonIconBehaviour.setIcon ( )
```

Sets the icon according to the volumen level.

The documentation for this class was generated from the following file:

- C:/Users/mrferrys/Documents/looneybits/works/unity/samsara/Assets/samsara/scripts/settings/sound↔  
ButtonIconBehaviour.cs

## 5.25 gameBehaviour.startGame Class Reference

Initializes the game flow.

Inheritance diagram for gameBehaviour.startGame:

### Public Member Functions

- **startGame** ([gameBehaviour](#) parent)
- override void **Reason** ()
- override void **Act** ()
- override void **DoBeforeEntering** ()
- override void **DoBeforeLeaving** ()

### 5.25.1 Detailed Description

Initializes the game flow.

The documentation for this class was generated from the following file:

- C:/Users/mrferrys/Documents/looneybits/works/unity/samsara/Assets/samsara/scripts/game/gameBehaviour.↔  
cs

## 5.26 StatsData Class Reference

Stats data class; manages the stats saved in PlayerPrefs.

Inheritance diagram for StatsData:

### Public Attributes

- string **variableName** = ""

### 5.26.1 Detailed Description

Stats data class; manages the stats saved in PlayerPrefs.

The documentation for this class was generated from the following file:

- C:/Users/mrferrys/Documents/looneybits/works/unity/samsara/Assets/samsara/scripts/settings/StatsData.cs

## 5.27 game\_core.TouchBehaviour Class Reference

Touch behaviour

Inheritance diagram for game\_core.TouchBehaviour:

## Public Member Functions

- virtual void [Awake](#) ()  
*Use this for initialization*
- virtual void [OnEnable](#) ()  
*Use this for initialization*
- virtual void [Start](#) ()  
*Use this for initialization*
- virtual void [Update](#) ()  
*Update is called once per frame*
- virtual void [OnTouchBegan](#) (Vector3 v)  
*Raises the touch began event.*
- virtual void [OnTouchCanceled](#) (Vector3 v)  
*Raises the touch canceled event.*
- virtual void [OnTouchEnded](#) (Vector3 v)  
*Raises the touch ended event.*
- virtual void [OnTouchMoved](#) (Vector3 v)  
*Raises the touch moved event.*
- virtual void [OnTouchStay](#) (Vector3 v)  
*Raises the touch stay event.*
- virtual void **action** ()

## Protected Attributes

- bool [touchSemaphore](#) = true  
*The touch sem.*

### 5.27.1 Detailed Description

Touch behaviour

### 5.27.2 Member Function Documentation

#### 5.27.2.1 Awake()

```
virtual void game_core.TouchBehaviour.Awake ( ) [virtual]
```

Use this for initialization

#### 5.27.2.2 OnEnable()

```
virtual void game_core.TouchBehaviour.OnEnable ( ) [virtual]
```

Use this for initialization

Reimplemented in [groundBehaviour](#).

#### 5.27.2.3 OnTouchBegan()

```
virtual void game_core.TouchBehaviour.OnTouchBegan (
    Vector3 v ) [virtual]
```

Raises the touch began event.

##### Parameters

<i>v</i>	V.
----------	----

Implements [game\\_core.ITouchable](#).

Reimplemented in [groundBehaviour](#).

#### 5.27.2.4 OnTouchCanceled()

```
virtual void game_core.TouchBehaviour.OnTouchCanceled (
    Vector3 v ) [virtual]
```

Raises the touch canceled event.

##### Parameters

<i>v</i>	V.
----------	----

Implements [game\\_core.ITouchable](#).

#### 5.27.2.5 OnTouchEnded()

```
virtual void game_core.TouchBehaviour.OnTouchEnded (
    Vector3 v ) [virtual]
```

Raises the touch ended event.

**Parameters**

<i>v</i>	V.
----------	----

Implements [game\\_core.ITouchable](#).

Reimplemented in [groundBehaviour](#).

**5.27.2.6 OnTouchMoved()**

```
virtual void game_core.TouchBehaviour.OnTouchMoved (
    Vector3 v ) [virtual]
```

Raises the touch moved event.

**Parameters**

<i>v</i>	V.
----------	----

Implements [game\\_core.ITouchable](#).

**5.27.2.7 OnTouchStay()**

```
virtual void game_core.TouchBehaviour.OnTouchStay (
    Vector3 v ) [virtual]
```

Raises the touch stay event.

**Parameters**

<i>v</i>	V.
----------	----

**5.27.2.8 Start()**

```
virtual void game_core.TouchBehaviour.Start ( ) [virtual]
```

Use this for initialization

### 5.27.2.9 Update()

```
virtual void game_core.TouchBehaviour.Update ( ) [virtual]
```

Update is called once per frame

Reimplemented in [groundBehaviour](#).

## 5.27.3 Member Data Documentation

### 5.27.3.1 touchSemaphore

```
bool game_core.TouchBehaviour.touchSemaphore = true [protected]
```

The touch sem.

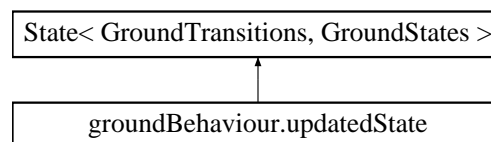

The documentation for this class was generated from the following file:

- C:/Users/mrferrys/Documents/looneybits/works/unity/samsara/Assets/samsara/scripts/controls/Touch↔Behaviour.cs

## 5.28 groundBehaviour.updatedState Class Reference

### [updatedState](#)

Inheritance diagram for groundBehaviour.updatedState:

### Public Member Functions

- **updatedState** ([groundBehaviour](#) parent)
- override void **Reason** ()
- override void **Act** ()
- override void **DoBeforeEntering** ()
- override void **DoBeforeLeaving** ()

### 5.28.1 Detailed Description

#### [updatedState](#)

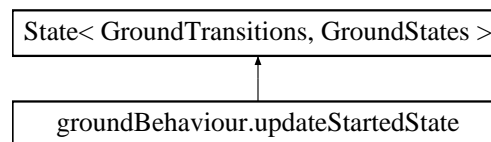

The documentation for this class was generated from the following file:

- C:/Users/mrferrys/Documents/looneybits/works/unity/samsara/Assets/samsara/scripts/game/groundBehaviour.cs

## 5.29 groundBehaviour.updateStartedState Class Reference

#### [updateStartedState](#)

Inheritance diagram for groundBehaviour.updateStartedState:

### Public Member Functions

- **updateStartedState** ([groundBehaviour](#) parent)
- override void **Reason** ()
- override void **Act** ()
- override void **DoBeforeEntering** ()
- override void **DoBeforeLeaving** ()

### 5.29.1 Detailed Description

#### [updateStartedState](#)

The documentation for this class was generated from the following file:

- C:/Users/mrferrys/Documents/looneybits/works/unity/samsara/Assets/samsara/scripts/game/groundBehaviour.cs

## 5.30 groundBehaviour.updatingState Class Reference

#### [updatingState](#)

Inheritance diagram for groundBehaviour.updatingState:

## Public Member Functions

- **updatingState** ([groundBehaviour](#) parent)
- override void **Reason** ()
- override void **Act** ()
- override void **DoBeforeEntering** ()
- override void **DoBeforeLeaving** ()

### 5.30.1 Detailed Description

#### [updatingState](#)

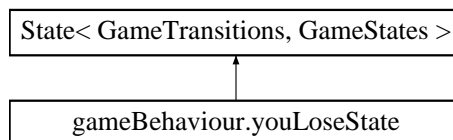

The documentation for this class was generated from the following file:

- C:/Users/mrferrys/Documents/looneybits/works/unity/samsara/Assets/samsara/scripts/game/groundBehaviour.cs

## 5.31 gameBehaviour.youLoseState Class Reference

Tells the player he/she is a loser and resets the score vars.

Inheritance diagram for gameBehaviour.youLoseState:

## Public Member Functions

- **youLoseState** ([gameBehaviour](#) parent)
- override void **Reason** ()
- override void **Act** ()
- override void **DoBeforeEntering** ()
- override void **DoBeforeLeaving** ()

### 5.31.1 Detailed Description

Tells the player he/she is a loser and resets the score vars.

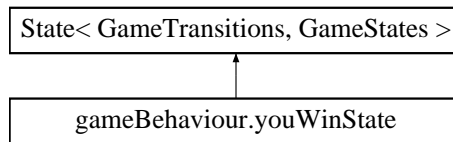

The documentation for this class was generated from the following file:

- C:/Users/mrferrys/Documents/looneybits/works/unity/samsara/Assets/samsara/scripts/game/gameBehaviour.cs

## 5.32 gameBehaviour.youWinState Class Reference

Tells the player he/she is the winner and increases the difficulty level.

Inheritance diagram for gameBehaviour.youWinState:

### Public Member Functions

- **youWinState** ([gameBehaviour](#) parent)
- override void **Reason** ()
- override void **Act** ()
- override void **DoBeforeEntering** ()
- override void **DoBeforeLeaving** ()

#### 5.32.1 Detailed Description

Tells the player he/she is the winner and increases the difficulty level.

The documentation for this class was generated from the following file:

- `C:/Users/mrferrys/Documents/looneybits/works/unity/samsara/Assets/samsara/scripts/game/gameBehaviour.↵  
cs`
